

**CHILLICOTHE MUNICIPAL UTILITIES**  
**LARGE COMMERCIAL SERVICE SCHEDULE - LP**

Effective 10/1/2017

**AVAILABILITY**

This schedule is available for service to large commercial service customers with an average monthly load of 25 kW or more.

**RATE:**

All kW	\$7.00	per kW
First 200 kwh/kW	\$0.07200	per kWh
Next 200 kwh/kW	\$0.06400	per kWh
Excess kwh/kW	\$0.05500	per kWh

In addition to the above charges, a Net Energy Cost Adjustment charge will be added on a per kWh basis when necessary. See Net Energy Cost Adjustment Clause schedule for current adder.

**DETERMINATION OF DEMAND**

The Demand hereunder shall be the highest kilowatt demand registered during the month by a suitable demand meter but in no case shall the billing demand be less than the minimum of 16 Kw.

**TRANSFORMER OWNERSHIP**

Where the customer supplies all facilities (other than metering equipment) for utilization of service at the voltage of the City's primary line feeding to such location, a discount of \$0.20 per kilowatt of Demand shall apply.

**METERING ADJUSTMENT**

The above rate applies for service metered at secondary voltage. Where service is metered at the voltage of the primary line feeding to such location, adjustment for billing shall be made by decreasing metered kilowatt hours by 3%.

**MINIMUM MONTHLY BILL**

The minimum monthly bill hereunder shall be based on a minimum demand of 16 kilowatts on the rate schedule. (\$112.00)

**LATE PAYMENT**

After twenty (20) days a late fee is charged to any outstanding balance and the account becomes subject for disconnection. Services disconnected for nonpayment will be restored upon payment of past due amount including late fee plus a reconnection charge. The charge for reconnection will be \$25.00 if the reconnection is made during regular working hours, and \$50.00 if the reconnection is made between the hours of 5:00 pm and 8:00 am, or on a Saturday, Sunday, or holiday.

## PILOT FEE AND SALES TAX

In addition to the charge based on monthly rates as computed above, the total monthly charge for service is subject to applicable sales tax PILOT Fee. See Schedule A for current PILOT rate.

## CONDITIONS OF SERVICE

1. The voltage, phase, and frequency of service hereunder shall be as approved by the City.
2. More than one character of service, as to voltage, phase, and frequency of delivery, shall not be combined for billing hereunder.
3. Service to each separate location or point of delivery hereunder shall be billed separately.
4. Service under this schedule is for the sole use of the Customer, and shall not be resold or sub-metered.
5. Lighting will be served hereunder, subject to the provisions of DETERMINATION OF DEMAND. Lighting service incidental to power may be rendered hereunder if such combined lighting and power is served through one point of delivery, and the Customer furnishes all additional equipment necessary for further transformation or regulation of energy for lighting service. Should such service to incidental single phase load result in phase unbalance, whereby the average of the separate loads on the three phases is less than 80% of the load of maximum to meet the above limitation. Should the customer fail to correct such phase unbalance, the Demand, as determined, shall be increased in due proportion to such phase unbalance, or such single phase service shall be rendered separately and billed under the appropriate rate covering such service.
6. All motors greater than 3 horsepower must be approved by CMU.
7. All polyphase motors of 25 HP and larger shall be controlled by reduced voltage starters. Reduced voltage starters shall be of the auto transformer, resistor, or part winding type.
8. The maximum size of any single phase motor shall be 5 HP.
9. The customer shall maintain a power factor of not less than 90% lagging. The average power factor during the month used for billing purposes shall be obtained from the measured kilowatt-hours and the measured reactive kilovolt-ampere hours taken during the month. The meter for measurement of reactive kilovolt-ampere hours will be ratcheted to prevent reverse registration. If the average power factor during the month is less than 90% lagging, the total bill for the month shall be increased 2% for each 1% or major fraction thereof by which the average power factor during the month is less than 90% lagging.
10. A service charge will be made to any customer requesting a meter be reconnected.
