

Water Leak Investigations

Leaks may develop in a house or underground. CMU will investigate if your water usage changes significantly. Call to request a check. CMU attempts to review meter readings which appear to show unusually high water usage. You will be notified of the possibility that a leak may exist. If you are already aware of the reasons causing higher water usage, disregard the notice.

The customer is responsible for the water line from the meter into the house and should contact their plumber if a leak occurs.
